

# Bio – Dr. Alexander Laubach

Dr. Alexander Laubach is the Head of Business Development for Medical Technologies & Biocompatibility at Hohenstein Laboratories. He works closely with manufacturers to support the development, testing and safety evaluation of medical devices, with a focus on biocompatibility and toxicological risk assessment.

With more than 10 years of laboratory experience across regulated industries, Dr. Laubach brings deep technical expertise in the documentation and compliance requirements for medical devices. His background spans analytical chemistry, toxicology, and regulatory science, helping ensure product safety and market readiness.

Dr. Laubach holds a Doctorate of Natural Sciences in Chemistry from the University of Hamburg.
