Hohenstein now offers Quality Label for workwear

BÖNNIGHEIM, GERMANY (Oct. 15, 2019) – In October 2019, testing partner and research institute Hohenstein released new quality labels for tested workwear and uniforms.

The Hohenstein Quality Label is issued for products that have been rigorously tested and meet defined minimum requirements. Testing criteria are based on decades of scientific research and considers practical, real-use situations. All testing is conducted in Hohenstein's accredited testing labs.

The Tested Workwear and Tested Uniforms labels highlight the product safety, quality and durability of workwear. Qualifications are based on demands specific to modern workwear and offer independent proof of quality.

Both labels can be tailored to validate claims for individual workwear and uniform requirements including tested fit, breathability, UV protection and suitability for leasing.

Garments earning the Quality Labels are required to undergo testing for harmful substances according to STANDARD 100 by OEKO-TEX®. This allows manufacturers, brands and retailers to communicate their commitment to safer and more effective workwear.

For more information visit www.Hohenstein.US/QualityLabel.

###

The Hohenstein Quality Label Tested Workwear is particularly suitable for workwear for factories, construction and all types of outdoor work, as well as medical scrubs, food service and hospitality.

The Hohenstein Quality Labels Tested Workwear and Tested Uniforms are used to label workwear with particularly high demands on product safety and quality. In addition to protecting the wearer from chemical residues on the product, comprehensive quality checks are performed to guarantee long-term durability.
